Memo to File:

Re: Energy Fuels
Hillside Mine
Act/037/015

On September 21, 1977, Ron Daniels and Brian Buck inspected this active uranium mine. The pad has been increased in size only slightly by waste dumping. According to Energy Fuels this work is cleanup and rejuvenation work only. As the mine was visited after normal working hours no one was present to describe the activity.

Brian W. Buck
ENGINEERING GEOLOGIST
